

NATIONAL TECHNICAL UNIVERSITY OF ATHENS  
INTERDEPARTMENTAL POSTGRADUATE COURSE OF STUDIES  
"ANALYSIS AND DESIGN OF STRUCTURES"

Co-funded by  
the European Union

Human Resources  
and Social Cohesion  
Programme

**SPRING SEMESTER 2023-2024-TIMETABLE**

|   | MONDAY                       | TUESDAY                    | WEDNESDAY                           | THURSDAY   | FRIDAY  |
|---|------------------------------|----------------------------|-------------------------------------|--|---|
| <b>107. Advanced Mechanics of Masonry</b><br>E. Vintzilaiou   |                              | 15.00-17.45<br>Classroom 4 |                                     |  |   |
| <b>108. Design of Cable and Membrane Structures</b><br>Ch. Gantes   |                              | 11.45-14.30<br>Classroom 4 |                                     |  |   |
| <b>109. Design of Technical Projects II</b><br>I. Ermopoulos  |                              |                            |                                     | 11.45-14.30,<br>Classroom 14                       |   |
| <b>110. Information Systems in Construction Management</b><br>J.-P. Pantouvakis   |                              |                            | 17.15-19.15,<br>Classroom 1         |  |   |
| <b>111. Engineering Materials</b><br>G. Fournalis   |                              | 8.45-11.30<br>Classroom 4  |                                     |  |   |
| <b>204. Engineering Seismology</b><br>D. Vamvatsikos, A. Sextos, O. Ktenidou  | 8.45-11.30,<br>Classroom 3   |                            |                                     |  |   |
| <b>205. Experimental Earthquake Engineering</b><br>Ch. Mouzakis   |                              |                            |                                     | 8.45-11.30,<br>Earthquake Eng. Lab                 |   |
| <b>206. Pathology and Design of Structures under Seismic Action</b><br>C. Spyrakos  |                              |                            |                                     |  | 14.45-17.30,<br>Earthquake Eng. Lab               |
| <b>208. Structural Intervention on Cultural Heritage Structures</b><br>M. Fragiadakis, C. Spyrakos, E. Toumpakari, I. Psycharis |                              |                            | 13.45-16.30,<br>Earthquake Eng. Lab |  |   |
| <b>304. Computational Methods in the Analysis of Underground Structures</b><br>M. Kavvadas                                      |                              |                            | 8.45-11.30,<br>Pc Lab, Sch. CE      |  |   |
| <b>305. Seismic Design of Surface and Underground Geotechnical Structures</b><br>A. Papadimitriou, G. Bouckovalas               | 11.45-14.30,<br>Classroom 3  |                            |                                     |  |   |
| <b>408. Boundary Elements</b><br>G. Tsiatas   |                              |                            |                                     |  | 8.45-11.30, Class.202,<br>Streng. of Materials    |
| <b>409. Load-carrying Behavior and Design of Structural Systems</b><br>L. Stavridis   |                              |                            |                                     |  | 11.45-14.30,<br>Static & Antis. Research.         |
| <b>410. Nonlinear Finite Analysis of Structures</b><br>V. Papadopoulos, K. Spiliopoulos   |                              |                            |                                     |  | 17.45-20.30,<br>Static & Antis. Research          |
| <b>411. Stochastic Finite Elements</b><br>V. Papadopoulos   |                              |                            |                                     | 16.45-19.30,<br>Static & Antis. Res.               |   |
| <b>412. Structural Optimization</b><br>N. Lagaros, S. Triantafyllou, V. Koumousis   | 15.00-18.00,<br>Classroom 13 |                            |                                     |  |   |
| <b>413. Applied Elasticity</b><br>G. Exadaktylos, P. Gourgiotis   |                              |                            |                                     |  | 10.30-13.30<br>Class.201,<br>Streng. of Materials |
| <b>414. Plasticity and Fracture of Materials</b><br>A. Giannakopoulos   |                              |                            |                                     | 14.45-17.30,<br>Class.202, Streng. of<br>Materials |   |
